

Back-To-School
with **Holubar**
Sew-It-Yourself Kits

Fun Family Projects . . .

Summer outdoor activities are fast coming to a close and once again the familiar "Back to School" theme will appear in newspaper ads and department store displays. As you begin plans for outfitting your children, have you ever considered how much money you spend on back to school outer garments that you could make yourself? . . . and realize a substantial savings for the family budget! Each sew-it-yourself kit illustrated here not only represents a substantial savings — approximately 40% — but we are confident that you can easily complete each kit, if you follow our step-by-step instructions . . . always illustrated with helpful photographs and drawings on all the key phases of construction. And with completion of one kit and your newly acquired knowledge of our sewing techniques . . . you're ready to try other kits. Even kits for the "adults" of the family, illustrated and described in full detail in our Holubar Mail Order catalog (free for the asking!).

Each Kit is complete, ready to sew with all pre-cut fabric components, accessories . . . even thread . . . and of course the step-by-step, illustrated sewing instructions.

We invite you to discover the enjoyment of sewing your children's back to school garments and carry-all packs and bags . . . all practical items for school . . . and, last but not least, we should point out our company policy . . . *if for any reason*, during the sewing of the kit you decide not to complete the kit . . . simply return for a full refund, including surface postage . . . how can you beat that? We desire your complete satisfaction!

Now, let's look at the products in detail . . . practical items that can become a fun family centered project!

... Easy to Do Yourself!

Holubar Kit directions have been designed to make them readily understandable to even an inexperienced sewer. Modeled after the popular SIMPLICITY patterns format, Holubar directions emphasize extensive illustrations and close-ups photos. Each Kit includes all materials, pre-cut and labeled, direction sheets, even thread. A sewing machine is all that is required!

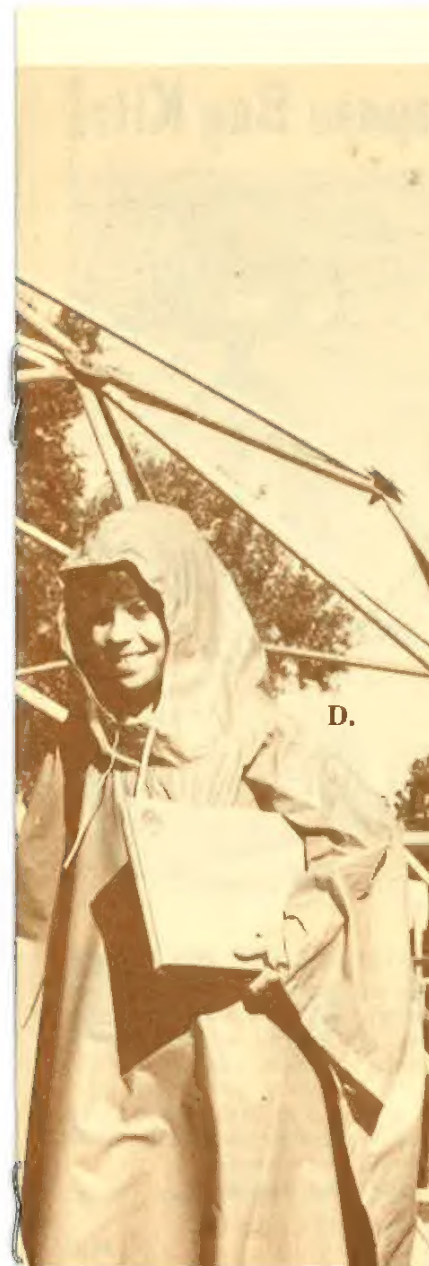

Holubar's patented down-filling Method, **PACKETTES***, allows our Prime Northern Goose Down insulation to be added *without the mess* that can occur when filling from an open container. Totally enclosed in a dissolvable film, the premeasured **PACKETTES*** are placed *unopened* into the garment.

Only after the garment is sewn shut is the **PACKETTE*** popped open to release the Down. When the garment is later washed during normal maintenance, the film completely dissolves without any effect on the Down.

Holubar Kits use only the finest quality materials throughout, be it zippers or our Prime Northern Goose Down insulation (garment grade is used exclusively). It is our intention to provide the sewer with outdoor equipment unsurpassed by anything available in ready-made form.

D.

"CHILD/JR. MOUNTAIN PARKA" (A)

A tough, durable wind parka that machine washes wrinkle-free. Made from a wind-tight, water-repellent Polyester and Cotton blend, lined with SUPERNYL nylon.
